

Sean Connolly

May Watts School is delighted to welcome critically-acclaimed author Sean Connolly on Thursday, November 9th. Mr. Connolly will talk with students about his career and his new book, The Book of Massively Epic Engineering Disasters: 33 Thrilling Experiments Based on History's Greatest Blunders.

To guarantee a personalized copy of his book, please return this order form with payment (cash or check payable to May Watts) by Thursday, November 9th. If you miss that date, there will be a limited supply of signed books available for purchase through November 17th.

The Book of Massively Epic Engineering Disasters

Hardcover \$14.95

Beginning with the toppling of the Colossus of Rhodes, one of the seven wonders of the ancient world, to the destructive, laserlike sunbeams bouncing off London's infamous "Fryscrapper" in 2013, here is an illustrated tour of the greatest engineering disasters in history.

Each engineering disaster includes a simple, exciting experiment or two using everyday household items to explain the underlying science and put learning into action. Understand the Titanic's demise by sinking an ice-cube-tray ocean liner in the bathtub. Stomp on a tube of toothpaste to demonstrate what happens to non-Newtonian fluids under pressure--and how a ruptured tank sent a tsunami of molasses through the streets of Boston in 1919.
