 at the same time!

Bitsbox is a crazyfun learning system for teaching kids about coding.

When you sign up, you'll receive a box of materials in the mail every month. Each box is a new level which introduces a new computer science concept. Bitsbox starts at \$20/month. Read (and see) all about it at...

www.bitsbox.com

Between now and December 31st, Bitsbox is donating \$25 from each Fry sale* directly to the school!

Use the promo code **FRY2017** when you're ordering on the website to make sure everything's tracked correctly (and YOU'll also save \$5 on your order).

Some kind words about Bitsbox from **K-12 math education specialist Amy Scheff**:

I have been blown away by what my two kids, ages 6 and 8, have learned so far. It's been amazing to see how quickly they were able to learn to code and then start to apply it in new and different ways. I love that each "lesson" from Bitsbox asks the kids to first code using lines already written and then asks them to apply and think critically about this code in order to modify the app. Bitsbox has given my kids meaningful experience in making their screen time both creative and thought provoking.

*Signing up for any Bitsbox subscription (Basic, Digital, or Deluxe) qualifies for a \$25 school donation!
