

Please keep me home if....

I have rash, lice or nits.

Lice or nits, body rash with blisters and/or fever.

I have a fever

Temperature of 99°F (taken before medication)

I am vomiting or have diarrhea

Two or more times in a 24-hour period.

I am just not looking well.

Unusually tired, headache, pale, lack of appetite, confused or cranky, or with a persistent cough.

I have an infection that might be contagious.

It is recommended you see a doctor.

Please keep your child home long enough for rest and recovery,

1. 24 hours after vomiting or bout of diarrhea
2. 24 hours fever free without medication
3. 24 hours after prescribed medication has been administered

This will assure your child is no longer contagious and will protect your child and others from illness. Thank you!
