

Starting this year school year, Indian Prairie School District #204 purchased Read and Write for Google as a Universal Design for Learning tool. All students K-12 (including students in the STEPS program) have access to this tool when they sign into Google Chrome with their IPSD Google login. Read and Write for Google is a powerful reading and writing support that many students can benefit from. Some features include: listening to on-screen text aloud, speech recognition, word prediction, and highlighting study tools.

If you are interested in learning more, please consider attending an upcoming informational meeting.
