Depression and suicide is impacting our homes, schools and communities. Suicide is the second leading cause of death for adolescents and young adults. Depression is the most common serious health disorder in the United States.

Dr. DiMatteo will discuss depression and the impact it, despair, loneliness and hopelessness all have on suicidal thinking and behaviors.

- How can we as parents and adults be aware of our children's and teen's struggles with depression and suicide?
- What can we do?
- What are remedies and preventive factors to the epidemic of depression and suicide?
- How do the roles of spirituality, faith and hope serve as remedies?
