

February 2022

Dear Parent(s) or Guardian(s):

This spring Indian Prairie Community Unit School District 204 will be administering the *College Board SAT Suite of Assessments*. Freshmen will complete the **PSAT 9**, sophomores will complete the **PSAT 10**, and juniors will complete the **SAT (with essay.)** This year juniors will test on April 13 (limited freshmen, sophomores, and seniors in attendance), while freshmen and sophomores will be tested on April 14 (limited juniors and seniors in attendance). Results of these assessments will be released in late May or early June and students can access results through their College Board account. Additional information regarding the *SAT Suite of Assessments* is available at <https://collegereadiness.collegeboard.org>.

Additional information for Juniors taking the SAT (with essay):

- Participation in a school day SAT is a state requirement for high school graduation.
- Juniors may elect to send their SAT scores to up to four colleges/universities at no charge. These colleges/universities must be identified on your student's answer document on the day of testing using the four-digit Score Reporting Code for each school. The list of codes are available at <https://satsuite.collegeboard.org/media/pdf/sat-score-reporting-code-list.pdf> and will be made available on testing day. (If students do not identify colleges/universities on test day, once scores are released, students can choose to send scores for a fee through their College Board account.)
- Juniors may elect to enter the *College Board Student Search Service* by calling 866-825-8051, sending an email to SearchCustomerService@collegeboard.org or through their College Board accounts. The *Student Search Service* is a free program that helps students get connected with colleges, universities and nonprofit scholarship agencies. When you opt in, you are allowing nearly 1,700 colleges to send you information about their programs, admission criteria and financial aid.

Federal law requires that students also be tested in the subject of science once during high school. The Illinois State Board of Education (ISBE) will require the administration of the Illinois Science Assessment to all juniors. Assessment content will include physical science, life science, earth/space science and engineering. The assessment is expected to take approximately three hours and will be administered in March. Administration details, including test dates, will be sent by buildings when plans are finalized.

Please contact your child's guidance counselor should you have any additional questions concerning these assessments.

Regards,

Charles Sprandel
Executive Director of Research and Assessment
Indian Prairie Community Unit School District 204
