

# Tinkering Camp

BUILD WITH REAL TOOLS TO SOLVE REAL PROBLEMS

**THINK. TINKER.  
MAKE. REPEAT.**

Build gadgets and gizmos that spur imagination, challenge creative thinking, and strengthen problem solving all while having a blast!

**FOR AGES: 4 – 15 YEARS**

Tinkering Camp provides children a creative and safe environment to collaborate with peers as they explore concepts in science, technology, engineering, art, and math.

**DAYS | TIMES**

**Mondays – Fridays | 9 am – Noon**

#### [Create Art with an Artist! Group Sales](#)

Laura Lynne's pre-recorded videos work towards a collaborative piece of art. We are thrilled to be able to offer this unique virtual program to schools and community groups. Looking for extra curriculum or enrichment?

#### [Collaborate with Laura Lynne Art](#)

Looking for extra curriculum or enrichment? Laura has created a page for groups that want to collaborate directly with her.

### Virtual Film Field Trips – NEW!

Incredible award winning films now available in your classroom only through DCM! These films take your students to places they've never been and tell stories they've never heard. Inspire your students with these adventures in your classroom or through a virtual platform. Packages come complete with DCM curated activities that align with local, state and national standards.

Select from these amazing films then contact DCM to make your reservation.

- **Dream Big: Engineering our World:** *Dream Big* transforms how we think about engineering. From the Great Wall of China and skyscrapers to underwater robots, solar cars and sustainable cities, it celebrates the human ingenuity behind engineering marvels and shows how engineers push the limits of innovation in unexpected and amazing ways.
- **National Parks Adventure:** *National Parks Adventure* is the ultimate off-trail adventure into the nation's untamed wilderness in places like Yosemite, Yellowstone, Grand Canyon and many more. As you bike, climb and hike through the parks, learn about natural sciences like geology, biology and ecology as well as geography, history and language arts.
- **America's Musical Journey:** *America's Musical Journey* tells the story of the unique cultures that gathered together to innovate and create new forms of thought and music in America. Hear the origins of jazz, blues, rock n' roll and hip hop. Unique in its narrative power, this film challenges students to see the intersection between art, history, language, and science.
